Professional Summary

Full Stack Developer with professional experience building and shipping production-ready web applications using React, Next.js, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, Socket.IO, and Supabase. Built and delivered a multi-tenant SaaS platform serving real paying clients, with experience in role-based access control, real-time systems, and modern frontend architecture. Currently contributing within a team environment with hands-on experience with authentication, Docker, and testing.

Professional Experience

Frontend Developer | Enexabit | May 2026 - Present

- Developed and maintained production web applications using React, Next.js, TypeScript, and modern frontend technologies within a team environment.
- Implemented authentication flows including session management and access/refresh token handling, alongside Docker/Docker Compose containerization and unit testing with Vitest.
- Presented multi-tenant SaaS frontend architecture and researched Feature-Driven/Clean Architecture and RBAC approaches for team adoption.

Full Stack Developer | Personal & Freelance Projects | October 2025 - Present

- Designed, built, and shipped production web applications using React, Next.js, TypeScript, Node.js, Express, MongoDB, and Supabase, with a focus on scalable frontend architecture and reusable components.
- Built and currently operate Zaki System, a multi-tenant SaaS platform serving live paying clients.
- Delivered client and personal projects covering e-commerce, real-time applications, authentication, API integration, PWA functionality, and modern responsive UI development.

Projects

Zaki System (Multi-Tenant Business Management SaaS Platform) | Independent Project | March 2026 - Present
[React, Next.js, Supabase, PostgreSQL, TanStack Query, Tailwind CSS, OneSignal, next-intl, React Router v7] | Live Demo

- Designed and built a multi-tenant SaaS platform for managing employees, products, orders, and sales, paired with a dedicated online storefront for each business.
- **Dashboard:** Built a role-based operations dashboard (Owner/Admin/Order Manager/Cashier) with tenant-isolated data enforced through JWT custom claims and Supabase RLS, real-time order tracking, sales analytics, and PWA push notifications.
- **Storefront:** Architected a single Next.js application serving independently branded storefronts for every tenant through domain-based tenant resolution, eliminating separate deployments per client and reducing hosting and maintenance overhead; currently powering 3 demo stores and live client stores.
- **Marketing Site:** Developed a bilingual Arabic/English marketing site with Next.js and next-intl, including locale-aware routing and full RTL support.

Zaki Chat | Independent Project | October 2026 - Present
[React 19, TypeScript, Node.js, Express 5, MongoDB, Socket.IO, TanStack Query, Tailwind CSS, Backblaze B2] | Live Demo | Frontend Code | Backend Code

- Built a 1-to-1 real-time visitor-to-owner messaging platform across a React 19 frontend (IndexedDB persistence) and a Node.js, Express 5, MongoDB, and Socket.IO backend.
- Implemented guest sessions with account upgrade, JWT with rotating refresh tokens, and AES-256-GCM encryption.
- Added WebSocket presence, read receipts, voice notes, direct Backblaze B2 media uploads, and Workbox PWA Web Push.

Skills

Technical Skills:

- **Frontend & UI:** React.js, Next.js, React Router v7, Tailwind CSS 4.1, TypeScript, JavaScript (ES6+), HTML5, CSS3, Vite.
- **Backend & Data:** Supabase (Auth, RLS, Edge Functions, Realtime), TanStack Query, Axios, REST APIs, Node.js, Express, MongoDB (Mongoose), Socket.IO, IndexedDB, JWT, Argon2, AES-256-GCM, OpenAPI.
- **Tools & Dev:** Git, GitHub, Docker, Vitest, OneSignal, Performance Optimization, Vercel, Netlify, Cloudflare, Zod, React Hook Form, shadcn/ui, Radix UI, Motion (Framer Motion), Backblaze B2, Web Push (VAPID), Workbox (PWA)

Education

Bachelor of Arts | Arabic Language Department
Alexandria University
